I am a Bachelor of Statistics graduate-to-be from Institut Teknologi Sepuluh Nopember, currently awaiting graduation. I have completed my final thesis on systemic risk measurement in Indonesian industrial-sector stocks, applying a hybrid parametric and machine learning approach. I have experience in data analytics, public relations, financial administration, and various training programs, and have been actively involved in several campus organizations and committees. I am currently an intern at the Transformation Management Office (TMO), PT Pelindo Terminal Petikemas, supporting strategic transformation initiatives and data-driven reporting.
